 Krakow

### SUMMARY

An experienced QA Engineer with more than 9 years of expertise in manual testing of mobile and web apps, including API testing. A collaborative professional with a proven ability to manage high-quality projects in fast-paced environments. Known for strong problem-solving skills and continuous professional development, committed to ensuring optimal product performance and user satisfaction.

### KEY ACHIEVEMENTS

*Revenue increase success -*

Increased client revenue by 15% through high-quality product delivery.

*Onboarding process optimization -*

Reduced QA onboarding time from five to two days.

*API coverage expansion -*

Helped to expand API test coverage by 60% with automation.

### SKILLS

- Functional, UI, API, Smoke, Regression, System, UAT testing, etc.
- Strong experience with client-server architecture (REST)
- Excellent understanding of SDLC, QA and Agile processes
- Writing comprehensive test documentation (checklists, test cases)
- Working collaboratively in a team environment, as well as independently
- Coordinating feature testing & releases to Apple / Play store
- Strong analytical and problem-solving skills with attention to detail
- Planning, estimating the scope of work, and evaluating tasks
- Hands-on experience with test automation (UI & API) - at a beginner level, actively expanding skills

### TOOLS

Test/Project Management Tools: Jira, Zephyr, Confluence, Trello

API & Logs: Postman, Charles, Swagger, Honeycomb, Datadog

DB & Cloud Services: Firebase, MongoDB, PostgreSQL

CMS: Elastic Path, WordPress, Wix

Web Technologies: HTML, CSS, DevTools

CI/CD: CircleCI, Jenkins, GitHub

Collaboration & Design Tools: Zoom, Slack, Fellow, Figma, Miro, Zeplin

Languages: SQL, JavaScript, TypeScript

Automation tools: Cucumber, Playwright

### EXPERIENCE

#### ZFORT Group, Senior QA Engineer

JUN 2022 - present

- Tested native iOS/Android and web apps for drone task management and e-commerce projects
- Led testing activities on the project
- Conducted functional, UI, exploratory, API, smoke, regression, and cross-browser testing in multiple environments
- Collaborated with cross-functional teams (FE & BE devs, designers, PMs) across several countries and multiple time zones to deliver features and improve product quality
- Participated in establishing automation framework (Cucumber) and assisted in API test coverage expansion

#### Achievements:

- Passed the FAA certification for the drone app on the first attempt, allowing the company to stay in business for another 3 years
- Developed the first BE autotests using a new tool and language (Cucumber/Gherkin)

Udemy. Playwright: Web

Automation Testing From Zero to Hero, Feb 2025

LinkedIn. Communication Skills for Modern Management. Feb 2025

### EDUCATION

Ukrainian Academy of Railway Transport.

Specialty: Specialized

Computer Systems, 2003-2008,

Master's degree

### TBWA\X, QA Engineer / QA Lead

SEPT 2020 - JUN 2022

- Planned testing activities, performed manual testing of mobile and web apps (FE, BE, API)
- Analyzed requirements and provided estimates for current projects and pre-sales
- Brainstormed with the team to suggest improvements or new features for the product
- Conducted interviews and participated in hiring decisions for new QA team members
- Onboarded and mentored Trainee/Junior QA Engineers, supporting their growth and development
- Led a team of 5 QA Engineers, ensuring high-quality testing across multiple projects
- Organized team-building activities, knowledge-sharing sessions, and workshops to foster collaboration and continuous learning
- Assisted in improving QA processes and standardizing workflows within the company

#### Achievements:

- Developed a QA Skill set matrix, allowing better visibility of individual strengths and enabling smooth resource allocation across different projects
- Optimized the onboarding process for QA team members, reducing time by up to 60% by implementing clear, step-by-step instructions

### TBWA\X, QA Engineer

OCT 2016 - SEPT 2020

- Led test planning, estimation, prioritization, and test execution across multiple projects
- Performed manual testing of mobile apps with microservices architecture (functional, UI, API, regression, localization, etc.)
- Created, reviewed, and updated test documentation
- Worked closely with developers, UI/UX designers, PM, and PO to ensure efficient testing and continuous delivery

#### Achievements:

- Helped a client increase revenue by 15% by delivering a high-quality product to end users
- Gained basic knowledge of JS and applied it to create the first set of automation tests for API in the company (Postman + JS + Jenkins)
